

## Anika Duut van Goor

**Director. AESIS Network for Advancing & Evaluating the Societal Impact of Science. The Netherlands.**

As Director of the international AESIS Organisation (for Advancing and Evaluating Societal Impact of Science) Anika brings together stakeholders in academia, government, industry and civil society to exchange experiences and good practices on demonstrating and optimising the impact of science (including AHSS) on well-being, economy, culture and more. In addition to developing conferences, courses and expert-meetings on several aspects within this spectrum, such as impact assessment, research strategy, science policy and many more, she also frequently performs as speaker on mapping stakeholders in the science impact eco-system, advising on integrating impact in an institutional strategy, and teaching skills for project management and engagement with non-academic players.

Anika received her Research Master's degree in Political Science and Public Administration from Leiden University, the Netherlands, where she continued working on research projects and teaching programmes for two years. Her project management skills were gained through her work at Médecins du Monde, TEDx and the film production industry. With a Musical Theatre degree from AMDA - New York in her back pocket Anika still manages to write and perform whenever she is not busy trying to help increase the utilisation of scientific knowledge and data for the wellbeing of people and the world they live in.
