

## Daniela Lud

***ENLIGHT Impact Ambassador Team 2024. Prof. for Environmental Assessment and Remediation. Rhein-Waal University of Applied Sciences. Germany.***

Daniela Lud is a graduate of University of Bayreuth. She did her PhD at the Free University of Amsterdam and worked as a consultant for several years. She is now Professor of Environmental Assessment and Remediation at the Faculty of Communication and Environment at Rhein-Waal University of Applied Sciences in Kamp-Lintfort (Germany). Her teaching and research focus on processes of sustainable land use and sustainable development, as well as the impact assessment of these multi-actor processes. Currently, she is part of the EU-FarmBook consortium and coordinates the impact activities of this project. The EU-FarmBook project is creating an interactive online knowledge platform for practice-oriented materials produced by EU-funded projects in the field of agriculture and forestry. Here, she works together with Inge De Bo (from Ghent University) and Eduard Mauri (from the European Forest Institute) to facilitate knowledge exchange between different actors, including learning communities from the agriculture and forestry sector, in order to promote innovation and knowledge sharing.
